

Runway construction at Berlin-Schoenefeld (SXF) Airport during summer 2017

The „Gemeinsame Obere Luftfahrtbehörde Berlin-Brandenburg (LuBB)“ has conditionally approved the reconstruction of the runway 07L/25R (northern runway) at Berlin-Schönefeld (SXF) Airport.

It was determined that the construction works are going to start on the **15th July 2017, 22:00utc** and last until the end of the next summer season (28th October 2017, 21:30utc).

Throughout this period all arrivals and departures will use the runway 07R/25L (southern runway) exclusively. Therefore, the taxiing time at SXF Airport will be increased by 10 minutes to 15 minutes in- and outbound.

With the beginning of the runway constructions new night flight regulations will become effective at the airport: Between 21:30utc and 03:30utc no planned operations are allowed.

In accordance with the increased taxiing time no arrival slots will be granted between 2145utc-0340utc and no departure slots between 2115utc-0310utc.

Between 20:00utc-21:30utc and 03:30utc-04:00utc planned arrivals and departures of jet aircraft with more than 20t MTOW must comply with ICAO Noise Chapter 4 (Noise Values min. 10EPNdB lower than ICAO chapter 3).

The AIP and “Nachrichten für Luftfahrer” will be updated accordingly.

If, against all odds, the „Gemeinsame Obere Luftfahrtbehörde Berlin-Brandenburg (LuBB)“ refuses the final approval, we reserve the right to make slot adjustments on short notice.
